Copy of Map of the Morley Reserve, defined as Indian Reserves Nos 143, 142 and 144.
The Letterpress which accompanies this map states that it was surveyed by A. P. Patrick, D.L.S. in 1879 and re-surveyed by John C. Nelson, D.L.S in 1888.
It will be observed that the Old Bow Fort is shown on this plan and that there are three buildings or foundations of them standing. This plan is signed by John C. Nelson and dated at Ottawa 23rd January, 1889.
It might be of interest to obtain if possible the field notes of the surveys, so far as they relate to the site of the Old Bow Fort. Those notes may show exactly what were the conditions at the time of the surveys.
